

MA WARRIOR NUTRITION GUIDE

1600 CALORIES | VEGAN

HOW TO FOLLOW YOUR PLAN

The general layout of the nutrition plan is based on a morning workout, which we find to be most suitable to the majority of people's schedule and the time where we are most likely to accomplish the workout if it is planned accordingly!

However, if this doesn't work for you, we can adjust very easily. What's important is that you have the meals that are labeled as pre-workout and post workout in that order. The other two meals of the day can be moved around to suit your needs.

LET'S EAT!

HOW TO FOLLOW YOUR PLAN

Wake Up:

Drink water to stay hydrated!
Try to drink as much water as you can through the day.

Tip: If you don't like drinking plain water, our TRU HYDRATE is an excellent way to add both flavor and function to your water by making it taste amazing, adding electrolytes, and skipping out on the sugar, artificial flavors, and fake colors you often find in flavored beverages.

1 hour before working out:

Fuel your body by consuming the "pre-workout" meal listed on your plan

20 min Before Working Out:

Energize with either espresso, black coffee, or TRU Energy to help jump start you before your workout & then complete your workout

Post Workout:

Enjoy your smoothie listed as the "post-workout" meal - this meal will refuel and replenish your body from the workout you just completed, jumpstart your recovery, and allow your body to continue burning fat!

Meals 3 and 4:

These two meals should be spread out throughout your day in the windows that work best for you. You will notice they are larger meals than you're probably used to eating, and they are meant to be very satisfying to avoid snacking in between meals! We had planned these meals to be very nutrient dense and in combination with your pre-and post workout meal to provide your body with all of the amazing nutrition it needs - from both Macro & Micro nutrients!
